ŠKODA YETI

SIMPLY CLEVER

120 YEARS ŠKODA AUTO SIMPLY CLEVER SINCE 1895
Inspiration awaits with the ŠKODA Yeti, no matter which road you take. Whether it’s the city with its incessant rhythm or the countryside where the road ends and a world full of secrets begins.

Available as either the Yeti or the Yeti Outdoor, the car can be further fine-tuned for your individual adventures with a selection of engines, front-wheel or 4-wheel drive, plus a range of accessories. And like any other ŠKODA, it offers numerous Simply Clever solutions. Like the handy flashlight in the luggage compartment.

This car is yet another example of 120 years of forward thinking; it means being passionate about making quality cars that are as much a joy to drive now as they were back when we started. Because looking back on our eventful history inspires us to look ahead.

That’s Simply Clever. That’s ŠKODA.

Laurin & Klement Voiturette type A, circa 1905.
The Yeti model line comes with a fresh exterior that reflects the current design language of ŠKODA. Simultaneously, the Yeti offers specific solutions depending on the version of the car. Yeti and Yeti Outdoor are two design lines that are based on the different requirements placed upon SUVs and their utilisation. Although the differences in the designs are evident at first glance, both versions have a lot in common. Most noticeable are the shape and placement of exterior features, determined by the design language of ŠKODA. These features include the bonnet, front grille, headlamps and fog lamps. The ŠKODA logo dominates the bonnet. The front wings, both bumpers and the 5th door have also undergone design changes.

The distinctive yet practical design of the Yeti version distinguishes itself with its body paint coloured features. These include protective side door strips, decorative door sill strips and bumpers hiding the lower parts. Another important distinguishing feature of the car is the honeycomb grille at the air intake opening on the front bumper. Roof railings come in either silver or black. The attractiveness of the Yeti version and its urban elegance is highlighted by alloy wheels (pictured are 17” Scudo alloy wheels).

The Yeti, of course, can go anywhere, but city streets really suit it. Perfect visibility when driving will give you a pleasant feeling and confidence behind the wheel, something which is invaluable in city traffic. As a compact SUV, the Yeti even enables you to park in limited spaces. The Yeti Outdoor makes its adventurous nature immediately clear. Discovering unknown places can be extremely exciting and at first glance it is clear that the outdoor version of the car is well prepared for that. Two-colour or black roof railings, black protective side door strips, bumpers with black lower parts, as well as massive vertical fins in the air intake opening on the front bumper and external alloy wheels (pictured are 17” Matterhorn alloy wheels) are all features that emphasise the individuality of the Yeti Outdoor version. Additionally, the car has a higher approach/departure angle, thus enticing you to head off the beaten track.
You will enjoy seeking out new adventures even more with the electrically-adjustable panoramic roof window, which allows you to create a large open space above the front seats.

The confident expression of both versions is enhanced by Bi-Xenon headlamps with LED daytime running lights with emblems located in the lower part of the lamps. The LEDs (Light-Emitting Diodes) fit well with the crystalline design of the front and simultaneously offer energy savings and a long service life. The shape and location of the fog lamps reflect the current design language of ŠKODA and are available with the Corner function.

The rear lights, with double C-shaped illumination, can be equipped with high-power LED diodes, which function as running and brake lights.

The rear bumper with the attractive silver cover in the urban style is one of the distinctive features of the Yeti version. In the rear you will discover many features that are now typical for the ŠKODA make: the logo, ŠKODA lettering, model name, triangular recesses defining the space for the number plate, and longitudinal reflectors for better visibility of the car.

The Yeti Outdoor will captivate you with its massive bumper and silver protective cover, which can be overlooked as it perfectly stands out next to the black plastic parts.

You will enjoy seeking out new adventures even more with the electrically-adjustable panoramic roof window, which allows you to create a large open space above the front seats.
The fastening system in the luggage compartment with horizontal slats and sliding hooks can be utilized in various ways. Hanging shopping bags is but one option. You can also use the system for securing things with a net or for holding the trays in the luggage compartment in the lower position (not shown).

The removable LED flashlight in the luggage compartment can come in handy when driving at night and during other circumstances. When clipped in, it automatically recharges while the engine is running.

The net programme, which reliably prevents things from shifting, offers several layout options.

The mid-level luggage compartment floor provides you with a hidden storage compartment. Simultaneously, the Simply Clever feature allows for handling luggage by bringing the floor of the luggage compartment closer to the loading edge.

You can use the double-sided carpet with the washable side up if you are not carrying anything that could dirty the car. When needed, simply turn it over with the washable-rubber side up (shown).

The VarioFlex rear seating system, which comes as standard equipment in both versions of the car, allows you to customize the interior according to your current situation and needs. It’s comprised of three independent rear seats, which allow you to not only fold down each one independently but also to easily remove them.

The net programme, which reliably prevents things from shifting, offers several layout options.
Closer inspection reveals many storage spaces and compartments because the entire concept of the interior is Simply Clever. Everything you need has its place in the interior including keys, mobile phones, glasses, parking tickets, maps, refreshments and any other necessities that you carry in your car. And, most importantly, you always know where to find them.

The eyeglasses compartment is located in the roof panel above the interior rear-view mirror, so the driver always has his sunglasses or driving spectacles within reach.

The eyeglasses compartment is located in the roof panel above the interior rear-view mirror, so the driver always has his sunglasses or driving spectacles within reach.

The closed storage compartment beside the front passenger can be air conditioned, so you will have pleasantly cool drinks during your trip.

The closed storage compartment beside the front passenger can be air conditioned, so you will have pleasantly cool drinks during your trip.

A special pocket for a reflective vest is located under the driver’s seat, ensuring it’s immediately within reach if you need it.

A special pocket for a reflective vest is located under the driver’s seat, ensuring it’s immediately within reach if you need it.

The parking ticket holder on the edge of the windscreen is a practical detail that will ensure that your parking ticket is always in a highly visible location.

The parking ticket holder on the edge of the windscreen is a practical detail that will ensure that your parking ticket is always in a highly visible location.

If you want to take some refreshments with you on your trip, you will surely welcome the dual drinks holder on the centre console.

If you want to take some refreshments with you on your trip, you will surely welcome the dual drinks holder on the centre console.

The storage compartment for small items in the upper part of the dashboard can be easily opened by touching the lid.

The storage compartment for small items in the upper part of the dashboard can be easily opened by touching the lid.
The removable Unibag, which is designed for transporting skis or snowboards, can be easily pushed through the opening between the luggage compartment and the passenger compartment. Rear seat passengers will appreciate foldable tables with drink holders, built into the backrests of both front seats, which of course can be used for more than just refreshments.

Rear seat passenger comfort is enhanced by a drink holder, which along with other accessories, such as a lighter and ashtrays, is part of the function package.

The foldable backrest of the front passenger seat gives the car even greater variability and allows you to transport objects with extraordinary dimensions.

When the waste basket is full, it can be easily removed and emptied. It can be inserted into the storage compartments in both the front and rear doors. The storage compartments in both front doors can hold a 1-litre bottle.
The top Bolero radio with a 6.5" colour touch-screen display comes with a USB/Aux-in connection, SD card slot and four 20W speakers. Bluetooth and DAB (Digital Audio Broadcast) come as optional. The device can even be used to control the car menu.

The Swing radio with a 5" colour touch-screen display comes with a USB/Aux-in connection, SD card slot and four 20W speakers. Bluetooth and DAB (Digital Audio Broadcast) come as optional. The device can even be used to control the car menu.

The Amundsen navigation system, controlled via a 6.5" touch-screen display, has two SD card slots and comes with an SD card pre-installed with maps. It is further equipped with all standard functions of a top radio, plus optional SmartLink system and DAB (Digital Audio Broadcast).

Providing you with comfort and orientation during a parking procedure is the primary objective of parking systems. Using sensors in front and rear bumpers, the Park Distance Control activates an audible signal based on the assumed directional movement of the car for any relevant obstacles, so that it does not unnecessarily warn you about front placed obstacles when the reverse gear is shifted.

The rear-view camera can be located on the 5th door handle. It monitors the space behind the car and indicates the driving lanes, based on the vehicle width. This assistant system is always supplied with parking sensors (Park Distance Control) and a radio or a navigation system, which shows your progress during parking on the display.

The Park Assist is a great helper. It will select an appropriate parking place, park in a row of parallel or perpendicular parked vehicles, and can even drive out of a row of parallel parked vehicles. In the case of parallel parking, it only needs a space 60 cm longer than the car itself.

With the SmartLink system (OSD OBD Connectivity bundle supporting MiroLink®, Apple CarPlay® and Android Auto®), the radio enables the driver to safely use the phone while driving. All installed applications that are certified as safe for vehicles are compatible with MiroLink®, Apple CarPlay® and Android Auto. Your car can be also equipped with the SmartGate system. It enables to connect your smartphone to the car via WiFi to access interesting data about your drive, like driving economy, driving dynamics or service information.

Climatronic, dual-zone air conditioning with electronic regulation and automatic air circulation, gives you the option of setting a different temperature for the left and right sides of the interior.

The electrically-adjustable driver seat is equipped with memory, which can store three different positions of the seat and the external side-view mirrors.

On long journeys on the motorway you will surely make full use of the Cruise Control, which is able to automatically maintain a constant speed. Additionally, you have the option of increasing or reducing speed without using the pedals. This function is controlled by a button on the side of the Cruise Control.

The KESSY system (Keyless Entry, Start and exit System) enables you to use the car without a key. To switch the engine on and off you simply use the Start/Stop button.

The electrically-heated front windscreen will quickly clear frost or steam and you are thus guaranteed a clear view in any weather.

The leather multifunctional steering wheel with chrome elements enhances your joy of driving the car. The top offer includes a 3-spoke sports steering wheel in perforated leather with controls for the radio, phone and the automatic DSG (Direct Shift Gearbox). The illuminated entry area by Boarding Spots, integrated into the external side-view mirrors, enables you to safely enter and exit the car even in complete darkness.

Noble steel foot pedal covers increase your feeling of comfort.

The electrically-adjustable panoramic roof window gives you the feeling of unlimited space and freedom. The front part of the sunroof can be tilted up and slid backwards. The rear part is firmly built into the roof. The tinted glass, of which both parts are made, has lower light transmission and thermal permeability, so it helps create an optimum climate and comfort inside the car. If needed, you can cover the entire sunroof with an electrically-adjustable roll cover.

On an exciting journey in pursuit of new experiences, the electrically-adjustable panoramic roof window gives you the feeling of unlimited space and freedom. The front part of the sunroof can be tilted up and slid backwards. The rear part is firmly built into the roof. The tinted glass, of which both parts are made, has lower light transmission and thermal permeability, so it helps create an optimum climate and comfort inside the car. If needed, you can cover the entire sunroof with an electrically-adjustable roll cover.
While the driver airbag is hidden in the steering wheel, the passenger airbag is located in the dashboard. If needed, it can be deactivated so that you can fit a child seat in the front seat.

The driver knee airbag prevents contact with the lower part of the dashboard in the event of a collision.

The passenger side airbags, which are activated by a side impact, protect the pelvis and chest of the passengers on the side rear seats.

The front side airbags protect the pelvis and chest of the driver and passenger in the event of a side collision. The height-adjustable WOKS front headrests are designed to protect the neck in case of a rear impact.

The head airbags, which create a “wall” along the side windows when activated, protect passengers’ heads in the front and rear.

The Driver Alert evaluates data from the power steering sensors at speeds above 65 km/h. When the system detects behavior indicating that the driver might be tired (such as more intensive driving direction corrections with the steering wheel), it recommends taking a break.

Whether on your daily drive to work or in pursuit of adventure, the Yeti provides you with maximum safety. In addition to excellent road holding, which can also be credited to advanced systems such as ESC (Electronic Stability Control), the Yeti has many passive safety features, whose task is to protect the passengers in extreme situations.

The rear side airbags, which are activated by a side impact, protect the pelvis and chest of the passengers on the side rear seat.

The double sun shield protects the driver and front passenger from blinding rays from both the front as well as the side.

The third headrest in the rear is height adjustable and increases the safety of the passenger in the middle seat.
Whether you are attracted to the stylish Yeti or you prefer the more adventurous Yeti Outdoor version, you can always choose between front-wheel or 4x4 drive. If you choose the 4x4 drive in combination with the off-road system, you can easily negotiate difficult terrain. The off-road option includes a number of functions such as hill descent assistant, the adaptation of systems, such as ABS (Anti-lock Braking System), ASR (Anti-Slip Regulation) and EDS (Electronic Differential System), to the driving conditions and a more sensitive accelerator pedal configuration. Another great helper that will prove itself is the start-up assistant, which helps you start moving up a hill.

The 4x4 drive and automatic DSG (Direct Shift Gearbox) are two state-of-the-art technologies, which in combination guarantee an extraordinary driving experience. The DSG (for cars with 4x4 drive available in 6-speed version) gives you great acceleration and enables you to maintain the engine at optimum revolutions per minute. If you maintain an economical driving style, you will achieve low fuel consumption and thus lower CO2 emissions.

Pressing the off-road button activates functions that will help you safely cope with difficult terrain.

The 4x4 drive is provided by an inter-axle electronically controlled multi-plate clutch. The coupling of the rear axle is automatic, so under normal conditions the car can utilise the advantages of front-wheel drive, and under adverse conditions the excellent traction of the 4x4 drive.

The pleasure of drives full of adventure. The ŠKODA Yeti and Yeti Outdoor 4x4.
The Monte Carlo logo recalls the success of ŠKODA vehicles at this legendary rally while also emphasizing our commitment to bring our motor sports experience to ŠKODA passenger cars. The ŠKODA Yeti Monte Carlo has championship genes. One of the key features is reliability, which is frequently a decisive quality on the racetrack.

The Yeti Monte Carlo is characterised by LED rear lights and decorative exhaust pipe ends pieces. The Monte Carlo logo can be found on both front mudguards. To further enhance the overall impression as well as the passengers’ comfort, the car is equipped with SunSet tinted windows in the rear.
The interior features sports seat upholstery in a combination of red, black and grey. The sports 3-spoke steering wheel in black perforated leather is decorated with red stitching.

The black exterior elements give the Yeti Monte-Carlo a unique style and a ferocious expression. The specific features in a black design include the front fog lamps, front grille frame, front bumper spoiler, external side-view mirrors and plastic guards lining the lower part of the vehicle. The black roof, which also comes as standard equipment, perfects the look.

The 17” Erebus alloy wheels in a glossy black design are an attractive option.

The 17” Origami alloy wheels with a polished surface in a Monte Carlo design.

The distinct style is underlined by the 17” Direkt alloy wheels with a polished surface in a Monte Carlo design.

The front door sill strips with a Monte-Carlo inscription have both decorative and protective functions.

The names Laurin & Klement belong to a duo of automotive pioneers who built their first car in their Mladá Boleslav factory, near Prague, back in 1905. The L&K brand (later ŠKODA, following the merger with ŠKODA FACTORIES) became a benchmark for the highest craftsmanship, revolutionary technical design and personal approach to customers. It is, therefore, fitting that the most luxuriously furnished ŠKODA vehicles now carry the name Laurin & Klement, a perfect testament to our predecessors’ legacy.

The protective side door strips in the same colour as the body instantly reveal that this is a car designed in an elegant urban style. The outdoor version has black strips with aluminium stripes. The Laurin & Klement plaquette can be found on both front mudguards.

Makes every day exceptional. The ŠKODA Yeti and Yeti Outdoor Laurin & Klement.
The backrests of the front and middle rear seats as well as the dashboard strip are decorated with the Laurin & Klement logo.

The electrically-adjustable panoramic roof window will enhance the exclusiveness of the Laurin & Klement version and will bring more riding enjoyment to the whole crew.

The Yeti L&K is equipped with the elegant two-colour 17" Annapurna alloy wheels.

The Yeti Outdoor L&K comes with the impressive two-colour 17" Origami alloy wheels.

The decorative door sill strips with noble slatted inserts and a Laurin & Klement inscription are another stylish detail.

The brown leather interior is lined with a Piano Black décor. The 3-spoke leather multifunctional steering wheel allows you to control the radio and telephone.
The Active version interior includes black decorative elements, such as door handles and air-ventilation frames. The standard equipment covers electric front window controls and electrically adjustable external side-view mirrors.

The Ambition version interior includes decorative chrome elements such as door handles and steering wheel details. You can choose from a number of seat upholstery. The standard equipment covers electrically-adjustable and heated external side-view mirrors and air conditioning.
The **Style** version interior includes decorative chrome elements. You can choose from a number of seat upholstery. The standard equipment covers height-adjustable driver and front passenger seats with lumbar support, dual-zone air conditioning, small leather package including a leather steering wheel.

The exclusive **sports seats** in a special design underline the dynamic character of your car. Available for the Ambition and Style versions as extra equipment.

The double-sided carpet provides a universal solution for the bottom of the luggage compartment. The velour side provides standard protection from soiling, while the non-slip plastic on the reverse side is there for transporting dirty or wet objects.

The decorative door sill covers with aluminium inserts effectively protect the door sills against mechanical damage when getting in and out of the car.

The net under the parcel shelf is not only a suitable storage place for an umbrella but anything you may want to separate from the other luggage as well.

The plastic dish with raised edges prevents the car upholstery from getting soiled or damaged. The dish can be easily taken out and emptied or wiped clean.

The double-sided carpet provides a universal solution for the bottom of the luggage compartment. The velour side provides standard protection from soiling, while the non-slip plastic on the reverse side is there for transporting dirty or wet objects.

The rear bumper cover foil protects the rear bumper as well as the loading edge, while the triangle-shaped stripes improve visibility of your car.

The clothes hanger is an extremely practical accessory mainly for those who travel to work wearing a suit.

The 17” Blossom alloy wheels in a sporty-elegant style will perfectly complement the design of both versions of the Yeti model.

The detachable tow bar will allow you to tow a trailer with brakes of up to 2,100 kg, based on the engine version.

The protective cover of the rear bumper will prevent any scratches when loading or unloading objects.

The detachable tow bar will allow you to tow a trailer with brakes of up to 2,100 kg, based on the engine version.

The protective cover of the rear bumper will prevent any scratches when loading or unloading objects.

The double-sided carpet provides a universal solution for the bottom of the luggage compartment. The velour side provides standard protection from soiling, while the non-slip plastic on the reverse side is there for transporting dirty or wet objects.

The net under the parcel shelf is not only a suitable storage place for an umbrella but anything you may want to separate from the other luggage as well.

The plastic dish with raised edges prevents the car upholstery from getting soiled or damaged. The dish can be easily taken out and emptied or wiped clean.

The double-sided carpet provides a universal solution for the bottom of the luggage compartment. The velour side provides standard protection from soiling, while the non-slip plastic on the reverse side is there for transporting dirty or wet objects.

The rear bumper cover foil protects the rear bumper as well as the loading edge, while the triangle-shaped stripes improve visibility of your car.

The clothes hanger is an extremely practical accessory mainly for those who travel to work wearing a suit.

The 17” Blossom alloy wheels in a sporty-elegant style will perfectly complement the design of both versions of the Yeti model.

The detachable tow bar will allow you to tow a trailer with brakes of up to 2,100 kg, based on the engine version.

The protective cover of the rear bumper will prevent any scratches when loading or unloading objects.

You can find these products in the ŠKODA Genuine Accessories range. For more information contact your authorised ŠKODA partner.

Global Fleet

The ŠKODA AUTO Global Fleet Services offer global fleet solutions to customers with all kinds of requirements. A fleet made up of ŠKODA offers unmatched comfort, long-lasting quality, safety, total costs of ownership and as a result excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.
One of the most important goals of ŠKODA AUTO is the development and manufacture of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our ŠKODA cars are produced using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines we offer meet the current emission regulations. All ŠKODA products are made using manufacturing processes that adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, ŠKODA cars meet technical, safety, quality and environmental requirements. ŠKODA AUTO contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses ŠKODA AUTO’s awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.
